

NEWSLETTER n° 6

QUALITY AND DESIGN, EPROSE PRIORITIES

- NEWS -

EPROSE is here presenting its newsletter from June with the last novelties. Small history because EPROSE was 20 years old in April, 2018 and yes years pass. We thank you for being many always also to trust us, what allows us to continue by proposing you quality tools made in our workshop THIERNIS.

- NOVELTIES -

EPROSE always attentive to the craftsmen, we take into account your remarks and meet your needs by improving the quality and the capacity of our tools. Below, the last novelties, and this time we thought of the saddlers, of course others are going to follow all year round.

Handle plier

Pliers used for fitting leather on saddles.

Hollow punches ovals

Ovals punches to screw in our removable stick, in black anodised aluminium, sold separately (300-EPM-018)
Punches in tempered steel,
Different sizes available, possibility to be done after requirement.

- EPROSE HAVE 20 YEARS OLD -

Little history :

The factory was created in April 1998 by YVAN GIBERT, current leader.
First of all, only for the diverse and varied study (special machine, specific tools...)

Since 2008, the beginning of the production of these tools and hiring of an employee.

In 2012, moving in a workshop relay to widen the manufacturing of these own products and the beginning of a specialization in tools dedicate for the leather with hiring of an employee specialized in digital control.

New moving in 2014 with purchase of a small workshop Thiernois and hiring of two new employees and specialization in manufacturing handle tools for the leather with new technologies to make efficient tools.

Ranges of products which widen every year (cut, strike, pliers, glue, tint, others) with always the same objective favor the quality and the ergonomics of tools.

An International Ambition .

- EPROSE CONCEPTION -

Always in the objective of evolution and progress, EPROSE is provided with CAO, FAO, PLM,
