

NEEDLE PUSHER TOOL

Needle pusher tool EPROSE.

This tool allows you to effortlessly push your needle through the leather. Indeed, while putting the needle in the hole of the black pusher and pushing on the handle, the pusher starts to retract and puts the needle through the leather. The spiral on the ferrule is made to coil the thread and stretch it while making the final knot. Handle in French boxwood. The needle pusher tool is made for a tipless tapestry needle nr 20 (Bohin). We can also supply this needle upon request.

To have it done, please send us the dimension of your needle or a sample of it.

Weight : 40 gr
Dimension : 115 x 26 mm
Ref. 310-OPA-020
